Product Overview

Industrial Double Chamber Vacuum Sealer

This double chamber vacuum packaging machine is a robust and efficient industrial solution designed for preserving food, pharmaceuticals, and electronic components. Constructed from durable high-grade stainless steel, it ensures excellent hygiene and long-term reliability in demanding environments. Featuring dual sealing bars and a high-performance vacuum pump, the machine maximizes throughput while ensuring an airtight seal to significantly extend shelf life.

Performance Metrics

Key Performance Indicators

40 m³/h

Pump Capacity

690 mm

Sealing Length

267 kg
