

Double Column Metal Band Saw

This metal band saw provides a robust and precise metal cutting solution for industrial applications. The double-column structure enhances stability and accuracy when handling large and heavy workpieces.

Overview

Industrial Precision Cutting

The H-Series Double Column Band Sawing Machine is engineered for heavy-duty industrial metalworking applications. Its robust double-column structure ensures exceptional stability and accuracy when handling large, heavy workpieces. Equipped with advanced hydraulic control systems, it provides smooth operation and precise cutting parameters for efficient, high-quality results across various metal types.

Technical Specifications

Machine Type	Double Column Band Sawing Machine
Model Designation	G-42320

Features

Key Features

- Double-column structure for enhanced stability
- Advanced hydraulic control system
- High-performance band saw blade
- User-friendly programming interface
- Integrated safety protection systems

Performance

Application Focus	Industrial Use, Heavy-duty Cutting, Metalworking
-------------------	--
