

Double-Compartment Petroleum Processing Equipment

This double-compartment petroleum equipment is engineered for efficient and safe operation. Its compact design is suitable for petroleum processing, storage, and distribution facilities, featuring a digital control panel for precise settings and durable construction.

Overview

Industrial Petroleum Processing Solution

This double-compartment petroleum processing equipment is engineered for high-efficiency and safe operation in demanding industrial environments. It features an integrated digital control panel for precise parameter management and a robust, durable construction designed for long-term reliability. Its compact footprint makes it a versatile choice for petroleum processing, storage, and distribution facilities requiring optimized space utilization.

Technical Specifications

Model Number	GS-15L-2W
Design Configuration	Double-compartment

Key Features

Control System	Digital Control Panel • Precision Settings
Build Quality	Durable Construction, Industrial Grade, Compact Design

Applications

Primary Applications

- Petroleum Processing
- Petroleum Storage
- Distribution Facilities
