

Double-Decker Railway Carriage for Passenger Transport

This is a double-decker railway carriage. It is designed for passenger transport on railway lines.

Product Overview

High-Capacity Passenger Transport

This double-decker railway carriage is engineered for efficient, high-volume passenger transport. Featuring a robust design with a two-tone aesthetic, it maximizes seating capacity while maintaining structural integrity for reliable rail operations. Ideal for commuter lines and regional transit networks requiring scalable passenger solutions.

Technical Specifications

Model Identifier	SRZ-10844
Carriage Type	Double-Decker Passenger Carriage

Design & Aesthetics

Key Design Features

- Multi-window layout
- End-access door
- Reinforced end structure

Exterior Color Scheme	White Upper Section, Blue Lower Section, Gray Stripe
