

Double Drawer Dishwasher and Disinfector

This appliance combines dishwashing and disinfection in one unit. Its double-drawer design allows for efficient cleaning and sanitization of dishes and kitchenware.

Overview

Professional-Grade Cleaning and Disinfection

This double-drawer dishwasher and disinfection apparatus offers a robust solution for maintaining high hygiene standards in kitchen environments. Designed with a dual-drawer configuration, it allows for efficient workflow and separate processing cycles for different types of kitchenware. The integrated digital control panel ensures precise operation, making it an essential appliance for facilities requiring both cleaning and sanitization capabilities.
