

Double Drawer Kitchen Disinfection Cabinet

This double drawer disinfection cabinet is designed for kitchen use. It features a stainless steel frame and black drawer fronts, likely utilizing UV or high-temperature sterilization to disinfect dishes and utensils.

Overview

Professional Kitchen Disinfection

This double-drawer kitchen disinfection cabinet offers a sophisticated solution for maintaining hygiene in professional or high-end residential kitchen environments. Featuring a sleek design with a coated glass panel and dark handles, it integrates seamlessly into modern cabinetry. The unit is equipped with intuitive touch controls and an LED display, providing customizable sterilization settings to meet specific sanitation needs.
