

Double Drawer Sterilizer for Electronics

This double-drawer sterilizer is designed for consumer electronics and IT products. It features a stainless steel exterior and a digital display for controlling the sterilization process.

Product Overview

Professional Electronics Sterilization

This double-drawer sterilizer is specifically engineered for the sanitization of consumer electronics and IT hardware. Its dual-chamber design allows for efficient, parallel processing, making it an ideal solution for maintaining hygiene standards in tech-focused environments. The unit features a robust stainless steel exterior and a user-friendly digital interface for precise control over sterilization cycles.

Technical Specifications

Number of Chambers	2
Exterior Material	Stainless Steel
Control Interface	Digital Display

Features

Functionality

- Dual independent sterilization chambers
- Programmable time settings
- Multi-mode sterilization cycles

Recommended Use	Consumer Electronics, IT Products, Hygiene Maintenance
