

# Double Flanged Bend Pipe Fitting

This double flanged bend fitting is suitable for water processing engineering applications. It is constructed from durable materials to withstand high pressure and corrosive environments.

## Product Overview

### High-Performance Double Flanged Bend

This double flanged bend pipe fitting is engineered for robust water processing and distribution applications. Featuring a smooth internal bore designed to minimize flow resistance and prevent sediment buildup, it ensures reliable performance in demanding environments. The unit is constructed from durable materials capable of withstanding high pressure and corrosion, while precision-machined flanges facilitate easy, leak-proof installation.

## Technical Specifications

### Available Lengths

- 6 meters
- 8.15 meters

Size Range	DN80 - DN2600 mm
Coating	Blue Epoxy

## Certifications & Standards

Certifications	ISO 9001, ISO 14001, GB/T 28001, French BV, Korea KS
----------------	--
