

Double Flat-Tube Mountain Bike

This mountain bike features a double flat-tube frame design. It is equipped with front and rear fenders, a rear rack, and multi-speed gears for off-road terrain.

Product Overview

Rugged Performance Design

This 26-inch mountain bike is engineered with a distinctive double flat-tube frame, providing a robust foundation for off-road adventures. Equipped with a 18-speed shifting system and reliable cantilever braking, it offers versatile control across varied terrains. The design integrates practical features like a rear rack and mudguards, making it a dependable choice for both recreational trail riding and daily transit.
