

Double Gang Rocker Switch

This double gang switch enables control of two separate circuits. It features a flush-mounted design with individual rocker switches, suitable for lighting and appliance control in homes and businesses.

Product Overview

Double Gang Rocker Switch

This double gang rocker switch is designed to provide efficient control over two separate electrical circuits from a single, centralized location. Featuring a durable plastic frame and a sleek coverplate, it offers a reliable solution for both residential and commercial lighting or appliance management. The standard 86x86mm dimensions and straightforward screw-fix installation make it a versatile choice for various interior setups.
