

Double Glass Half-Cut Solar Panel

This high-efficiency photovoltaic module features double glass construction and half-cut cell technology. The module is designed for optimal energy generation in various environmental conditions.

Overview

High-Performance Double Glass Half-Cut Solar Module

This double glass half-cut solar panel is engineered for exceptional reliability and energy yield in diverse environmental conditions. Featuring advanced cell interconnection technology, the module minimizes micro-cracks and power loss while offering superior durability against sand, acid, and alkali exposure. With a 30-year linear performance warranty and low thermal coefficients, it provides a robust, long-term solution for residential, commercial, and utility-scale solar projects.

Performance & Warranty

Key Performance Metrics

30 Years

Linear Warranty

0.5 %

Annual Degradation

Reliability Features

PID Resistant, Snail Trail Free, Micro-crack Resistant, 100% EL Inspected

Durability & Safety

Environmental Ratings

Parameter	Rating
Fireproof Level	Class-A
Wind Load	2400 Pa
Snow Load	5400 Pa
Hail Resistance	35 mm
Hail Impact Speed	97 km/h
