

Double Induction Cooktop with Independent Controls

This induction cooker features two independent cooking zones for simultaneous cooking. Each zone is equipped with a digital display and touch controls for precise temperature and time management.

Overview

Professional Double Induction Cooktop

This double induction cooktop provides a versatile solution for high-efficiency cooking environments. Featuring two independent cooking zones, it allows for precise control over separate heating processes simultaneously. Designed with safety in mind, it includes clear warning indicators and intuitive touch-sensitive controls for each zone, making it a reliable choice for demanding commercial or professional kitchens.
