

Double Induction Cooktop with Independent Controls

This double induction cooktop offers independent controls for each cooking zone. It features adjustable time settings, power level adjustments, and a child lock.

Product Overview

Professional Double Induction Cooktop

This double induction cooktop offers high-performance cooking with independent control systems for each zone, allowing for precise temperature and time management. Designed for efficiency and safety, the unit features a durable, smooth surface that is exceptionally easy to clean. Integrated safety mechanisms such as the child lock and high-temperature warning indicator make it a reliable choice for professional culinary environments.
