

Double Inductive Bracket for Fluorescent Lamps

This double inductive bracket is designed for fluorescent lamps. Its non-noise electromagnetic design ensures reliable and efficient operation.

Product Overview

Reliable Fluorescent Lighting Solution

This double inductive bracket is engineered for efficient and stable fluorescent lamp operation. Designed with a non-noise electromagnetic architecture, it provides a quiet and reliable lighting environment suitable for professional settings. Its robust construction ensures safety and convenience, making it an ideal choice for large-scale commercial and institutional lighting installations.
