

Double Jacket Fire Hose

This synthetic fire hose features a thin-walled, light internal lining, resulting in a lightweight build and small coil diameter. Ideally suited for fire brigades, its limited space requirement makes it recommended for use in wall hydrant cabinets.

Product Overview

Industrial-Grade Fire Hose

This double-jacket fire hose is engineered for high-performance firefighting applications requiring maximum reliability. Its construction features a circular woven polyester fibre design for superior abrasion resistance and long-term durability. The specialized vulcanized rubber lining maintains elasticity and flexibility, ensuring excellent performance under demanding field conditions.

Technical Specifications

Service Test Pressure

400 PSIG
Service Test

Dimensions

- 2-1/2 inch diameter
- 50 foot length

Construction Material

Double Synthetic Yarn Jackets with Polyester Fibres

Internal Lining

Thin-walled synthetic rubber
