

Double Needle Four-Thread Chain Stitch Bag Closing Machine

This double needle, four-thread chain stitch bag closing machine is designed for heavy-duty applications. It is suitable for closing bags made of paper, burlap, woven polypropylene, and jute.

Overview

Heavy-Duty Bag Closing Solution

The GK8-24 is a specialized double needle, four-thread chain stitch machine engineered for high-performance bag closing. Designed for durability and reliability, it excels in heavy-duty applications across agricultural, chemical, and food processing sectors. This machine ensures secure, tamper-evident closures on a variety of materials, including paper, burlap, woven polypropylene, and jute.

Technical Specifications

Suitable Industries

Agricultural • Chemical • Food Processing

Stitch Configuration

Double needle, four-thread chain stitch

Compatible Materials

Paper, Burlap, Woven Polypropylene, Jute

Performance

Key Performance Features

- High-speed operation
- Robust construction for long service life
- Secure, tamper-evident closure
