

Double Pole Electrical Switch

This double pole switch is designed to switch both live and neutral connections. It features robust construction with a molded plastic finish and is available in 20 Amp and 32 Amp ratings.

Product Overview

Professional Double Pole Switching

This double pole electrical switch is engineered for reliable control of both live and neutral connections. Featuring a robust white molded plastic construction, it is built to withstand demanding electrical environments. Available in both 20 Amp and 32 Amp ratings, this component is an ideal solution for various commercial and industrial electrical applications requiring enhanced safety and isolation.

Technical Specifications

Key Features

- Double pole isolation
- Robust construction
- Versatile electrical application

Available Current Ratings	20 Amp, 32 Amp
Switch Configuration	Double Pole (Live and Neutral)
Material and Finish	White Molded Plastic
