Double Pole Isolation Switch

This double-pole isolation switch is designed for industrial applications, providing a reliable way to disconnect electrical circuits for maintenance or safety. It features robust construction and a manually operated red handle.

Product Overview

Industrial-Grade Isolation

This double-pole isolation switch is engineered for reliable performance in demanding industrial environments. Designed to provide a secure method for disconnecting electrical circuits, it is essential for maintenance safety and operational control. The unit features a robust construction with screw terminals for secure, long-lasting connections, making it an ideal choice for machinery and industrial applications, particularly within the textile and apparel sectors.

Technical Specifications

Rated Voltage	415 V
Pole Configuration	Double Pole
Operation	Manual
Connection Method	Screw Terminals

Key Features

Ideal Applications

- Industrial Machinery
- Textile Machinery
- Apparel Manufacturing Equipment
- Circuit Maintenance

Safety Indicators	Red Handle, Clear On/Off Indication
