

Double Reflector Tabletop Heater

This compact heater features two independently adjustable heating elements. It is designed for tabletop or floor use, providing efficient localized heating.

Product Overview

Compact Double Reflector Heating Solution

This double reflector tabletop heater is designed to provide efficient, localized warmth in small spaces. Featuring two independently adjustable heating elements, it allows for targeted heat projection to maximize comfort while conserving energy. With its compact design and decorative floral aesthetic, it serves as a practical and stylish heating solution for both tabletop and floor placement.
