

Double Row Concrete Grinding Wheel

This double row diamond grinding wheel is designed for efficient material removal and surface preparation. Its durable construction uses high-quality diamond segments for extended life and consistent performance.

Product Overview

High-Efficiency Grinding Performance

This double row diamond grinding wheel is engineered for aggressive material removal and professional surface preparation. Its durable construction incorporates high-quality diamond segments designed for extended service life and consistent performance across various projects. The specialized double row configuration ensures efficient grinding action, while integrated vents facilitate debris removal and cooling during operation.

Technical Specifications

Design Features

- Double row diamond segments
- Cooling vents for debris removal
- Durable construction

Tool Compatibility

Angle Grinders • Compatible Power Tools

Compatible Materials

Concrete, Stone, Hard Materials
