

Double Row Diamond Cup Wheel Grinder

These double row cup wheels are designed for grinding and material removal on surfaces like concrete and stone. Their robust construction and diamond segments arranged in a double row provide aggressive cutting action and an extended lifespan.

Product Overview

Double Row Diamond Cup Wheel Grinder

This double row diamond cup wheel is engineered for fast, efficient grinding and material removal on concrete, stone, and masonry surfaces. Featuring a robust construction with diamond segments arranged in a double row configuration, these wheels provide aggressive cutting action and extended lifespan. They are an ideal solution for leveling, smoothing, and shaping applications in demanding construction and renovation projects.

Application & Compatibility

Compatible Materials	Concrete, Medium Granite, Brick Block, Stone
Tool Compatibility	Angle Grinder
