

Double Section Pipe Repair Clamp

This double-section pipe repair clamp provides a robust and reliable solution for repairing damaged pipes. The clamp is secured with multiple bolts and nuts, allowing for precise adjustment and a tight, leak-proof seal.

Product Overview

Versatile Pipe Repair Solution

The Double Section Pipe Repair Clamp is designed for efficient, long-lasting repair of damaged infrastructure. Featuring a 2-piece design, this sleeve allows for quick maintenance across various pipeline types including steel, cast iron, PVC, PE, and fiber cement. Its high tolerance minimizes the number of models required, providing a reliable and cost-effective solution for field technicians.

Technical Specifications

Pressure Ratings

16 bar

PFA (DN 40-150)

10 bar

PFA (DN 175-300)

Nominal Diameter Range	DN 40 to 300
Operating Temperature	+0°C to +60°C
Angular Deviation	4 °
Certifications	WRAS

Construction

Pipe Material Compatibility

- Steel
- Cast Iron
- PVC
- PE
- Fiber Cement

Design & Protection

Double Section • Bituminous Coating • Corrosion Resistant

Applications

Target Applications

- Distribution networks
- Fire protection networks
- Irrigation networks
