

## Double Strand Sprocket with 1/2 inch Pitch

This double sprocket features a 1/2" pitch and a plain stock bore. The sprocket is designed for use with roller chains and provides efficient power transmission.

### Product Overview

#### Industrial Double Strand Sprocket

This double strand sprocket is engineered for reliable power transmission in demanding industrial environments. Featuring a 1/2 inch pitch and a 40 chain number, it is designed to handle increased loads with its double configuration. The plain stock bore allows for versatile shaft mounting, making it an adaptable component for various mechanical systems.

### Technical Specifications

#### Teeth Hardening
