Product Overview

Professional Beverage Dispensing Solution

This double-tank refrigerated beverage dispenser is engineered for high-volume commercial environments, offering a reliable solution for serving chilled juices, iced tea, and other non-carbonated beverages. Featuring food-grade polycarbonate bowls and an intelligent temperature control system, it ensures both hygiene and consistent serving temperatures. The unit's robust stainless steel construction, combined with a quiet, super-cooling refrigeration system, makes it a durable and efficient addition to restaurants, cafes, and buffet lines.

Technical Specifications

Total Capacity	36 L
Number of Tanks	2
Cooling Technology	Stainless Evaporator, Built-in Copper Tube, Super Cooling

Design & Build

Construction Materials

- Food-grade Polycarbonate (PC) Bowls
- Stainless Steel Base
- Stainless Steel Evaporator

Key Features

Rotating Mixing Type • Intelligent Temp Control • Mute Design
