

Dough Rolling and Shaping Machine

This professional food processing machine is designed for rolling and shaping dough. It features adjustable rollers for varying thickness and a hopper for continuous dough feeding.

Overview

Professional Dough Processing Solution

This professional-grade dough rolling and shaping machine is engineered for high-efficiency food processing environments. It features a continuous feeding hopper and precision-adjustable rollers, allowing operators to achieve consistent dough thickness for a variety of applications. Designed with industrial-grade construction, it is an ideal solution for pasta, pastry, and bakery production lines.

Key Features

Suitable For

- Pasta
- Pastry
- General Dough-based Products

Capabilities

Dough Rolling, Dough Shaping, Continuous Feeding, Adjustable Thickness

Design & Safety

Design Highlights

Industrial Construction • Safety Equipped • Easy-to-clean
