Overview

Professional Dough Sheeting Solution

This dough sheeter is engineered for high-efficiency pastry production, featuring bidirectional sheet pressing and robust stainless steel construction for optimal hygiene. Designed for versatility, it is an ideal solution for bakeries, hotels, restaurants, and institutional dining facilities. With integrated safety features and adjustable rollers, this machine ensures consistent dough thickness and reliable performance in demanding food processing environments.

Performance & Construction

Key Features

- Bidirectional sheet pressing
- Adjustable roller thickness control
- Integrated conveyor belt system
- Protective safety covers
- Emergency stop mechanism
- Mobile design with wheels

Certifications

CE • National Health Standard Compliant

Material Composition

Stainless Steel, Food-Grade Surfaces

Applications

Suitable Applications

- Pastry production
- Pizza dough preparation
- Bread dough processing
- Commercial kitchens
- Hotel dining rooms
