

Dovetail Milling Cutter - High-Speed Steel

High-speed steel dovetail milling cutter is designed for creating precise dovetail slots and edges. It features multiple cutting teeth arranged around the periphery for efficient material removal on steel, aluminum, and plastic.

Product Overview

High-Performance Dovetail Milling Cutter

This high-speed steel dovetail milling cutter is engineered for creating precise dovetail slots and edges with professional-grade accuracy. Featuring multiple cutting teeth arranged around the periphery, it ensures efficient material removal and a smooth finish. Designed for versatility, this tool is suitable for machining steel, aluminum, and plastic, making it an essential component for both metalworking and woodworking applications.

Technical Specifications

| | |
|----------------------|--|
| Material | High-Speed Steel |
| Compatible Materials | Steel, Aluminum, Plastic |
| Mounting | Central bore for milling machine arbor |

Performance Features

Key Features

- Precision ground dimensions
- Multiple peripheral cutting teeth
- Efficient material removal
- Smooth surface finish

Applications

Primary Applications

Dovetail slots • Dovetail joints • Metalworking • Woodworking
