

Dovetail Router Bit for Woodworking

This dovetail cutter is designed for creating dovetail joints in woodworking. It features a cylindrical shank for mounting in a router and angled cutting edges to produce the dovetail shape.

Product Overview

Precision Dovetail Cutter

This professional-grade dovetail router bit is engineered for creating strong, interlocking dovetail joints in various woodworking projects. Designed with precision cutting edges, it ensures clean, accurate cuts for both functional and decorative joinery. The bit features a standard cylindrical shank compatible with most routers, making it a versatile addition to any woodworking workshop.

Technical Specifications

Tool Compatibility

- Standard Routers
- CNC Routers

Cutting Angle

14 degrees

Shank Type

Cylindrical

Primary Applications

Dovetail Joints, Woodworking, Joinery
