

Downtube Shifters for Bicycles

These downtube shifters are designed for mounting on the downtube of a bicycle frame. They allow the rider to change gears with a classic design suitable for restoration projects or retro builds.

Product Overview

Classic Downtube Shifter Set

These downtube shifters are designed for vintage and classic bicycle restoration projects or retro builds. Featuring a durable construction with polished alloy levers and a composite base, they provide a reliable and authentic gear-changing experience. This set is an ideal choice for enthusiasts looking to maintain the aesthetic and functional integrity of classic bicycle frames.
