Overview

Automated Case Packing Solution

This automated carton packaging machine is a high-efficiency 3-in-1 monoblock solution designed for sorting and packing doypack pouches into carton boxes. It seamlessly integrates case forming, pouch loading, and sealing into a single compact unit to optimize production workflows. Engineered for precision, it handles pouches up to 1 liter or 1 kilogram while maintaining high throughput.

Performance & Capacity

Throughput Capabilities

160 pouches/min
Sorting Capacity

15 cases/min
Case Packing Speed

Packing Configuration

Parameter	Specification
Max Product Capacity	1 Liter / 1 Kilogram
Packing Pattern	12 pouches/row, 1 row/case

Technical Requirements

Utility Requirements

- Power Consumption: 8 kW
- Compressed Air: 6-8 bar

Construction & Design

Stainless Steel Construction, Monoblock Design, Adjustable Conveyor Belts, Emergency Stop Mechanisms, Protective Guarding
