

Dozer Blade Cutting Edge End Bit

Dozer blade cutting edges and end bits are essential for earthmoving, grading, and land clearing. Manufactured from durable materials, these parts offer extended wear life and optimal performance.

Product Overview

Essential wear components designed for efficient grading and earthmoving.

High-Performance Dozer Wear Parts

These cutting edges and end bits are engineered for heavy-duty earthmoving, grading, and land clearing operations. Manufactured from hardened steel, they provide exceptional resistance to abrasion and impact, ensuring a long service life in demanding environments. Precision-drilled mounting holes allow for a secure fit and easy installation, minimizing equipment downtime and maintaining peak operational efficiency.

Technical Specifications

Hardened steel construction with precision-engineered bolt holes for a secure fit.

| | |
|---------------------|--|
| Material | Hardened Steel |
| Key Features | Wear Resistant, Impact Resistant, Precision Drilled, High Durability |

Compatibility

Compatible Machinery

- Dozers
- Excavators
- Loaders
- Motor Graders
- Electric Shovels

Industry Applications

- Construction
- Mining
- Agriculture
- Land Clearing

Available Components

Available in various sizes and configurations to suit different heavy machinery models.

Wear Part Varieties

- Cutting Edges
- End Bits
- Tooth Tips / Points
- Tooth Adapters
- Wear Caps
- Lip Shrouds
- Heel Shrouds
- Kwiklok Liners

Model Reference

Reference Part Numbers

| Series | Standard / MT Variants |
|----------------|--|
| 5F Series | 5F5191, 5F3102 |
| 7F Series | 7F8103, 7F8104, 7F8094 |
| 4T Series | 4T6230, 4T6229, 4T6232, 4T6231, 4T2977, 4T3043, 4T3044 |
| 6Y Series | 6Y5839, 6Y5840, 6Y5841, 6Y5842 |
| 8E Series | 8E9379, 8E9378, 8E9377, 8E7078, 8E7079 |
| 140/141 Series | 141-0413, 140-6787, 140-6788, 141-2238 |
| 9F Series | 9F7073, 9F7074, 9F7075, 9F7076 |
