

Dozer End Bit for Earthmoving Equipment

This dozer end bit is compatible with various earthmoving equipment. It is engineered to withstand tough working conditions, providing reliable performance and longevity.

Product Overview

Heavy-Duty Earthmoving Component

This dozer end bit, identified by part number 195-71-11173, is engineered for demanding construction environments. Designed to provide superior wear resistance and impact strength, it ensures reliable operation for bulldozers and other heavy machinery. With multiple material options available, this component is built to extend service life and minimize costly equipment downtime.

Technical Specifications

Equipment Compatibility

Bulldozers • Earthmoving Machinery

Part Number	195-71-11173
Material Composition	Boron Steel (30MnB), Manganese Steel (16Mn)
