

Dried Bean Sorting Machine

This machine efficiently sorts dried beans based on color. It ensures high-quality output by removing defective or discolored beans.

Overview

High-Efficiency Sorting Technology

This advanced sorting machine is engineered specifically for the precise separation of various dried legumes and beans. By utilizing high-speed optical recognition, it ensures consistent quality and purity in your final product batches. Designed for industrial food processing, it helps streamline production lines while maintaining high standards of cleanliness and sorting accuracy.

Capabilities

Compatible Products

Green Mung Beans, Cashews, Kidney Beans, Pinto Beans, Black Beans, Dark Red Kidney Beans
