

Drill Auger Holder for Rotary Drilling Rigs

This holder is designed for drill augers used in various rotary drilling rigs. It is compatible with rock drilling augers and soil drilling buckets.

Product Overview

High-Performance Drill Auger Holder

This durable holder is engineered for rotary drilling rigs, providing secure and efficient bit retention for rock drilling augers and soil drilling buckets. Designed for demanding mining and drilling applications, it ensures optimal fit, stability, and consistent drilling accuracy. With a focus on high-speed performance and extended service life, this component helps minimize downtime and maximizes daily production volume.

Compatibility

Supported Components

- Rotary Drill Rigs
- Rock Drilling Augers
- Soil Drilling Buckets
- Flat Teeth Holders

Compatible Models

HQC10, HQ43H, HQ30, HQ85
