Product Overview

High-Performance Pneumatic Breaker Tools

These professional-grade drill bits are engineered for high efficiency and reliability in demanding construction and mining environments. Designed specifically for use with pneumatic breaker tools, they offer superior rock fragmentation and durability. Their robust construction ensures extended service life and consistent performance across a wide range of demolition and drilling applications.

Applications

Operational Functions

- Perforating
- Split/Rock Breaking
- Ramming
- Spade Chisel
- Fracturing
- Blasting Mining

Primary Applications

Mining, Construction Demolition, Geological Prospecting, Foundation Engineering, Cement Road Breaking, Asphalt Surface Breaking, Fire Rescue
