

Drill Press for Metal and Wood

This drill press is designed for precise drilling in metalworking, woodworking, and fabrication. It features a cast iron base, adjustable worktable, and depth stop for accuracy and ease of use.

Product Overview

Versatile Precision Drilling

The DP Type Drill Press is a robust and versatile machine designed for precision drilling in both metal and wood. Featuring a sturdy cast iron base and column, it ensures enhanced stability and reduced vibration during operation. This reliable tool is ideal for machine processing, professional repairs, and general fabrication applications.

Technical Specifications

Construction Features

- Cast iron base
- Sturdy column for stability
- Adjustable worktable
- Depth stop mechanism
- Secure drill chuck

Applications

Metalworking, Woodworking, General Fabrication, Machine Processing, Repair Services

Safety & Control

Safety Equipment

Chuck Guard • Emergency Stop Button
