

Drilling and Tapping Machine

This drilling and tapping machine is a versatile machine tool designed for both drilling and tapping operations. It is engineered for precision and efficiency, making it suitable for a wide range of metalworking applications.

Product Overview

Dual-Purpose Drilling and Tapping Solution

The ZS Series Drilling & Tapping Machine is a high-performance machine tool engineered for precision metalworking tasks. Designed for both drilling and tapping, this robust unit offers the stability and durability required for consistent industrial output. With adjustable speed settings and an intuitive worktable design, it provides excellent versatility for workshops and manufacturing facilities needing reliable, multi-functional operation.

Operational Features

Primary Functions	Drilling, Tapping
Speed Control	Yes

Design and Build

Worktable Features

- Easy workpiece positioning
- Simplified clamping process

Construction	Robust heavy-duty build for enhanced stability
