

# Drilling Auger for Soil and Rock

This drilling auger is designed for efficient soil and rock penetration in construction and geotechnical applications. It features a helical flight design for rapid material removal, along with durable cutting teeth made of high-strength steel.

## Product Overview

### Professional Drilling Auger

This drilling auger is engineered for high-performance soil and rock penetration in demanding construction and geotechnical environments. Featuring a helical flight design, it ensures rapid material removal and superior drilling speed across various stratum. The tool is compatible with a wide range of drilling rigs, making it an essential component for piling, foundation work, and precise soil sampling projects.

## Technical Specifications

### Applicable Stratum

- Hard rock
- Gravel
- Intense to weakly weathered rock
- Hard permafrost

### Key Features

Helical flight design • High-strength steel teeth • Adaptable connection system

### Primary Applications

- Piling
- Foundation work
- Soil sampling

### Available Auger Types

Taper, Standard
