

Drilling Machine

The drilling machine is a versatile tool designed for creating precise holes in various materials. It features a robust construction with a sturdy base, a vertically adjustable worktable, and a drilling head equipped with a powerful motor.

Product Overview

Versatile Industrial Drilling Solution

The Z5040 is a robust drilling machine engineered for precision and durability in demanding metalworking and woodworking environments. Featuring a powerful motor and a multi-speed control system, it adapts seamlessly to various materials and drilling diameters. Its integrated coolant system and safety features, including a protective shield and emergency stop, ensure high performance and operator safety.

Key Performance Metrics

Performance Highlights

40 mm

Max Drilling Diameter

Technical Specifications

Model	Z5040
Speed Control	Multi-speed control system for material adaptation
Depth Control	Calibrated depth stop for accurate drilling

Design & Construction

Build Quality

- Robust construction with sturdy base
- Vertically adjustable worktable
- High-performance drilling head
- Powerful integrated motor

Safety & Maintenance

Safety Equipment

- Protective safety shield
- Emergency stop button
- Integrated coolant system for heat dissipation

Compliance & Applications

Certifications

CE

Target Industries

Metalworking, Woodworking, Industrial Manufacturing
