

Drilling Triplex Mud Pump

This drilling triplex mud pump has an API 7K certificate. It is also ISO 9001'2008 certified and OEM interchangeable.

Overview

High-Performance Triplex Mud Pump

The F-1300 is a high-performance triplex mud pump engineered for demanding drilling operations. It features a robust forged steel fluid end for durability under high pressure, alongside a power end with a heavy-duty crankshaft and connecting rods for reliability. Designed with a replaceable valve and seat system, it simplifies maintenance and reduces downtime, making it suitable for oil and gas, geothermal, and water well drilling applications.
