

Drip Irrigation Tape Production Machine

This single blade labyrinth type drip irrigation tape making machine is a new production facility for plastic irrigation tape. The resulting product is used in cropland and gardens to save water and energy, improving output and profits.

Product Overview

High-Efficiency Irrigation Tape Production

This advanced drip irrigation tape machine utilizes cutting-edge extrusion technology to deliver consistent labyrinth patterns for uniform water distribution. Designed for reliability and ease of use, it features precise temperature control systems to ensure the production of durable irrigation solutions. The robust construction makes it an ideal investment for manufacturers seeking to streamline agricultural product manufacturing.

Technical Specifications

Control System

- Precise temperature control
- User-friendly control panel
- Real-time parameter monitoring

Technology Type

Single blade labyrinth extrusion

Certifications

Standards & Certifications

CE • ISO • TÜV Rheinland
