

Drip Irrigation Tape

Drip irrigation tape delivers water directly to plant roots for efficient and precise watering. It minimizes water waste and promotes healthy growth in various agricultural applications.

Overview

Efficient Agricultural Irrigation

This drip irrigation tape features integrated emitters designed for precise water delivery directly to plant roots. It is engineered to minimize water waste while promoting healthy growth across various agricultural applications including row crops, orchards, and vineyards. The design ensures uniform water distribution, which helps in reducing the risk of foliar diseases and maintaining consistent soil moisture.

Key Performance Metrics

Core Specifications

10 cm

Emitter Spacing

2 L/h

Flow Rate

Technical Details

Construction

High-Quality Materials • Weather Resistant • Long-lasting Performance

Model Number	OS011610
Emitter Configuration	Integrated internal emitter

Application

Key Benefits

- Minimizes water waste
- Promotes healthy plant growth
- Ensures uniform water distribution
- Reduces risk of foliar diseases

Recommended Applications	Row Crops, Orchards, Vineyards, Agricultural Irrigation
