

Drive Disc Assembly for Wheel Loaders

This drive disc assembly is designed for use in wheel loaders. It is manufactured from durable materials to ensure reliable power transmission.

Product Overview

High-Performance Drive Disc Assembly

This drive disc assembly is engineered for heavy-duty applications, providing robust construction and precision-machined features to ensure optimal performance. Designed for efficient power transmission, it facilitates improved heat dissipation for increased component longevity. Ideal for demanding machinery environments, this part meets rigorous quality standards to ensure dependable operation in the field.

Technical Specifications

Part Number	2030900020
Warranty Coverage	6 months for main components

Certifications

Certifications	CE, ISO 9001

Service & Logistics

Service Guarantees

- Pre-shipment inspection with detailed photos and videos
- 100% compensation for incorrect parts
- 100% compensation for damage due to packaging
- Lifetime after-sales service
