

Drop Forged Wire Rope Clip, Hot Dip Galvanized

This U.S type drop forged wire rope clip is hot dip galvanized. It is constructed from drop forged steel, providing a strong clamping force to prevent slippage.

Product Overview

Professional Grade Wire Rope Terminations

This U.S. Type drop forged wire rope clip is engineered for high-strength, reliable wire rope terminations in demanding industrial and marine settings. Its hot dip galvanized construction ensures exceptional corrosion resistance, significantly extending service life in harsh environments. The robust design provides superior clamping force to prevent slippage, meeting rigorous industry standards for safety and performance.

Technical Details

Material & Process	Drop Forged Steel, Hot Dip Galvanized
Clamping Strength	Yes

Applications

Suitable Environments

- Industrial rigging
- Marine applications
- Heavy-duty lifting
