

Drop Segment Abrasive Blade 105-350mm

This abrasive blade features drop-shaped segments for efficient material removal and enhanced cooling. It is designed for cutting concrete, stone, and other abrasive materials.

Overview

High-Performance Drop-Segment Abrasive Blade

This professional-grade abrasive blade is engineered with a unique drop-segment design that protects the core from undercutting while ensuring efficient material removal. Featuring turbo segments for enhanced cooling and superior dust extraction, it provides clean, precise cuts with minimal chipping. It is an ideal solution for heavy-duty applications involving concrete, masonry, and stone.

Key Features

Design Advantages

- Drop-segment design to prevent blade undercutting
- Turbo segments for optimized cooling and dust removal
- Durable construction for long-lasting performance
- Reduced noise levels during operation

Applications

Suitable Materials

Concrete, Brick, Block, Masonry, Stone

Technical Specifications

Available Sizes & Dimensions

Model	Segment Height (mm)	Segment Width (mm)	Arbor (mm)
STF105	8	2.2	22.23
STF115	8	2.2	22.23
STF125	8	2.2	22.23
STF150	8	2.2	22.23
STF180	8	2.5	22.23
STF230	8	2.7	22.23
STF250	8	2.7	22.23
STF300	10	2.9	25.4
STF350	10	2.9	25.4

Max Segment Height

10 mm

Max Height

Compatibility

Compatible Tools

Angle Grinders • Circular Saws • Electric Tools
