

Dry Iron with Adjustable Temperature

This dry iron is designed for use with AC220-240V power supplies and has a power range of 1000-1200W. It features an adjustable temperature knob for different fabric types and a swivel cord.

Overview

High-Performance Dry Iron for Professional Results

This heavy-duty dry iron is designed for efficiency and precision, featuring a high-quality ceramic coating soleplate for smooth gliding across various fabric types. With a powerful 1000-1200W heating element and six adjustable temperature settings, it provides optimal heat control for delicate silks to heavy linens. The ergonomic design includes a swivel cord and button grooves to ensure easy operation and professional finishing in any garment care environment.
