

Drywall Hatchet

This drywall hatchet is a specialized hand tool for drywall work. It features a unique head for setting nails/screws and a blade for scoring and cutting.

Product Overview

Professional Drywall Installation Tool

The Drywall Hatchet is a specialized hand tool engineered for efficient drywall installation and repair tasks. Featuring a dual-purpose head design, it enables both precise nail setting with a rounded face and clean, accurate sheet cutting with a sharp hatchet blade. The ergonomic handle is crafted from non-slip materials, ensuring maximum control and safety for professional installers.
