

# Drywall Jab Saw for Plasterboard

This drywall jab saw is designed for making quick and precise cuts in drywall and plasterboard. It features a sharp, hardened steel blade with aggressive teeth for effortless piercing and sawing.

## Product Overview

### Professional Drywall Jab Saw

This drywall jab saw is precision-engineered for making quick and accurate cuts in plasterboard, drywall, and similar soft construction materials. Featuring a hardened steel blade with aggressive teeth, it allows for effortless piercing and sawing, making it an essential tool for electrical box cutouts and fixture installations. The ergonomic handle is designed for comfort and control, minimizing hand fatigue during demanding renovation or construction projects.

## Technical Specifications

Model Number	DT1403
Blade Material	Hardened Steel

## Usage & Applications

### Key Features

- Aggressive tooth design for fast cutting
- Ergonomic handle for secure grip
- Hardened steel blade for durability
- Designed for piercing and sawing

Primary Applications	Drywall, Plasterboard, Electrical Box Cutouts, Fixture Installation, Construction, Renovation
