

# Drywall Sander with Dust Extraction

This drywall sander is designed for efficient and smooth surface preparation. It features an ergonomic handle for comfortable operation and a powerful motor for fast material removal.

## Overview

### Professional Surface Preparation Solution

This drywall sander is engineered for high-performance surface preparation on drywall and plaster. Equipped with a robust motor and an integrated dust extraction system, it ensures efficient material removal while maintaining a clean and safe working environment. The ergonomic handle design promotes operator comfort during extended use.

## Performance

### Rated Power

**850 W**

Power Input

### No-load Speed

1400 RPM

## Technical Specifications

### Supply Voltage

230 V, 50 Hz

### Disc Diameter

180 mm

### Sandpaper Diameter

180 mm

## Features

### Key Capabilities

Dust Extraction, Ergonomic Handle, Drywall Compatible, Plaster Compatible
