

# Drywall Screws

Drywall screws are specifically designed for attaching drywall to wood or metal studs. They come in various sizes and finishes, including black phosphate coating, and may include collated strips for use with automatic screw guns.

## Product Overview

### Professional Drywall Fastening Solutions

These professional-grade drywall screws are engineered for efficient and reliable installation in various interior construction applications. The assortment includes specialized options such as collated strips designed for high-speed automatic screw guns, as well as individual fasteners featuring black phosphate coatings for enhanced durability. With precision-engineered bugle heads for perfectly flush mounting and self-drilling tips for rapid penetration, these screws ensure a secure hold and a clean, professional finish.

## Technical Features

Head Type	Bugle Head
Tip Type	Self-drilling
Finish / Coating	Black Phosphate

## Application & Compatibility

### Compatibility

- Manual installation
- Automatic screw guns (collated strips)

### Primary Usage

Drywall Installation • Interior Construction
